

Evening Glow

Few things will impact your home's curb appeal more than a quality lighting design. Increase the long-term value of your property and extend your outdoor living time by installing a LED low-voltage lighting system. Call 303.721.9003 and ask for our lighting team to schedule a free nighttime lighting demonstration.

Designed for Living

Whether you are looking for a place to entertain or relax, your outdoor living area should complement your lifestyle. If your landscape needs a renovation or full design/build installation, call 303.721.9003 to schedule a consultation with one of our landscape designers. Call soon; our spring and summer schedules fill up fast.

Meet our Team

Holly Terry, Landscape Designer

For 13 seasons, Holly has enriched the lifestyles of her clients through her unique designs and enthusiasm. Holly loves working at DesignsCAPES Colorado, because the team is an extended family. The people here inspire and encourage her to do her best. One of our core values is to deliver exceptional quality. Holly holds this value near to her heart because she believes that delivering a quality product will enhance the lives of her clients and allow them to enjoy their space for years to come. Originally from a small town outside of Dayton, Ohio, Holly embraces the mountain lifestyle of Colorado. She loves to spend her free time with her children or being outdoors gardening, hiking or strolling through botanic gardens.

A Letter from our Team

There is nothing quite like spring in Colorado.

It was a pleasure taking care of all your landscape construction and maintenance needs in 2018.

This year will mark our 27th year! The growth we've experienced over the years is because of clients like you, who faithfully support our business.

In 2020 our newsletters will become digital. To continue to receive our newsletter, send your email address to info@designscapes.org and write "Digital Newsletter 2020" in the subject line with your name.

We look forward to the spring season and our continued relationship with you, where we can provide you with the best service possible.

Designscapes Colorado, Spring 2019

Your Guide to Spring

Kick off spring with these recommendations from our maintenance pros to enjoy your outdoor living all season long.

Natural, stylish, and unique flower trends for 2019

- ◆ **Colorful blooms**
Light-hearted and playful, 2019's PANTONE color of the year, "Living Coral", will bring optimism and good spirits to your garden. Flowers of "Living Coral" include Tropicana Hybrid Tea Rose, Wizard Coral Sunrise Coleus, Sombrero Hot Coral Coneflower, and Horizon Coral Spice Geranium.
- ◆ **Succulents**
Looking for a low-maintenance water-wise option that creates a bold statement? Succulents are more popular than ever and are a great option in place of your traditional annual flower pots. The dark tones and various textures will create an eye-catching display that will brighten your patio or entry.

Spring cleaning

Getting your lawn healthy early is the key for it to endure the summer heat and stress. Wait until soil is dry to rake, fertilize, aerate, spray weeds and mow. Also, refresh garden beds with mulch and prune shrubs to cleanup after winter's residue.

Water saving tips for your sprinkler system

- ◆ **Short watering sessions**
Applying too much water to your lawn increases water runoff. Split your watering time into short sessions. Take 15 minute breaks between each session to allow the water to soak in.
- ◆ **Early riser**
The best time to water your lawn is between 5 am and 10 am. The cool morning temperatures decrease the chances of water evaporation.
- ◆ **Inspect and protect**
Complete routine inspections on your sprinkler system. It could prevent costly repairs and water bills in the long run.

To learn more about and to schedule any of our maintenance services, call our maintenance team at 303.721.9003 and they will put together a custom landscape maintenance package for your home.
